"A hardworking and resourceful engineer who is self-motivated, self-sufficient and comes to you with a strong background in robotics, computer science, and electronic engineering."

"With the work on RTOSs, he has 15 years of experience. He is an agile and test-driven developer following the philosophy: One can only develop fast when developing well."

■ **SKILLS**

PROGRAMMING LANGUAGES

ENVIRONMENTS & FRAMEWORKS

DEVELOPMENT PROCESS

DEV OPS

■ **EXPERIENCE WITH:**

Platforms:
ARM Cortex M4, RISC-V, STM32, dsPIC, AVR, TriCore

Bus:
I²C, UART, SPI, RS-232

Communication:
Bluetooth, TCP/IP

Standards:
ISO 26262, ASPICE

■ **SPOKEN LANGUAGES**

■ **INTERNATIONAL EXPERIENCE**

Sheffield/Leeds, UK > 7 Years

Glasgow, UK > 1 Month

Cambridge, UK > 1 Month

Austria > remaining

WORK EXPERIENCE

Advanced Software Engineer

Great Wall Motors Austria R&D GmbH

Mar 2020 - Today

Kottingbrunn, AT

I am developing inverters for electrical motors. This includes:

- Developing architecture & components (AUTOSAR 4.2.2)
- Programming in C, Configuring Modules with ISOLAR-A/B & RTA-Car
- Improving Process and Automation with Python
- Introducing Agile methods and TDD

GAINED SKILLS

Standards:
ISO 26262
A-SPICE

Process Improvements
Introduced TDD & Agile
Trialed Pair Programming

Programming:
C on Infineon TriCore
TDD for Embedded Target
Python for Automation
Tasking Compiler

Senior Lecturer

University of Applied Sciences Technikum Wien

Apr 2020 - Dec 2021

Vienna, AT

I was teaching:

- Digital Systems and Computer Architecture
- Hardware-near Software Engineering
- Embedded Systems Software

My research areas are RTOS, embedded systems, and robotics.

Management:
Large groups
Mentoring

Digital Fundamentals
Computer Architecture
Digital Circuits

Programming:
C on Linux
C on ARM Cortex M4
TI - RTOS
Timers, IRQ, GPIO

Researcher / PhD Candidate

University of Sheffield

Oct 2013 - Mar 2020

Sheffield, UK

My research focused on developing a Real-Time Operating Systems (RTOS) for robots, designing optical communication, and the impact of processing large data sets on swarm robots.

Development:
C, C++, Qt,
OpenCV, R

Research
RTOS, Robotics
Optical Communication

Other:
Project Management
Publications
Mentoring

Freelancing: Software Engineer (part-time)

SZ Informationstechnik

Mar 2014 - Feb 2016

Sheffield, UK

I provided bug fixes, updates, and extensions to a cross-platform automatic announcement system (see next).

Development:
C++, Qt, git
Networking/Sockets

Documentation writing

HEAD OF RESEARCH AND DEVELOPMENT

SZ Informationstechnik

Sep 2011 - Sep 2013

Vienna, AT

I was a founding member of SZIT and successfully developed a cross-platform automatic announcement system currently used at all subway stations across Vienna.

Development:
C++, Qt, git
Networking,
SQL, Doxygen

Architecture
Software and GUI
API

Other:
Project management
Client Relations
Negotiation

Software and Embedded Systems Engineer

Data and Measurement Services GmbH

Sep 2011 - Sep 2013

Vienna, AT

I developed embedded systems, designed software, and provided support for the client. This work involved interaction with many customers and smaller projects.

Development:
C, git
SQL
Access

Hardware
Networks
Circuit Design

Other:
Project management
Client Acquisition
Teamwork
